

TeamMED India 2020

What: Running a drugs and alcohol education program in underprivileged schools

When: 2-3 weeks either at the end of November or early December

Where: Rural villages in Dharamshala, a city located in North India

Who: 7-10 medical students, all year levels are welcome to apply!!

Logistics:

- The trip will cost around \$1700 inclusive of flights/accommodation/food/transport/internet
- A translator is provided as part of the overall cost, so knowing Hindi is **not** essential!!

More details

The TeamMED India trip generally lasts for 2-3 weeks, during which you have the opportunity to fully immerse yourself in the culture through many meaningful learning experiences. This trip essentially involves visiting schools in the mornings, delivering an interactive and fun program on drug and alcohol abuse prevention to schoolchildren (generally 15-18-year olds). The afternoon sessions on most days will involve visiting

families in rural communities to develop a better understanding of the social context that is driving drug and alcohol abuse in this population.

This trip is without a doubt, a wonderful experience that will give you the opportunity to truly make a meaningful difference in the lives of people who are less fortunate than us. We encourage everyone even slightly interested to apply, as this truly is a life-changing experience!!
